

HELP US ATTRACT
FOREIGN INVESTMENT
TO VANCOUVER
ISLAND

What's the point?

The Government of Canada granted Foreign Trade Zone Point designation (FTZVI) to the Vancouver Island Economic Alliance (VIEA) in September 2018.

An FTZ Point is one of Canada's strategic locations for international trade where an organization with a mandate to promote local trade and foreign direct investment is uniquely supported by a single-point of access to information on relevant government policies and programs.

Anm Task Force with representatives from various government departments will be coordinated by ITT-VI to problem solve and to facilitate easy access to a suite of programs that make up the **m** advantage:

Duty Relief Program - Relieves the payment of duties on imported goods that will eventually be exported either in the same condition or after being consumed, expended or used in processing other goods. This can have significant cash flow benefits for Island manufacturers.

Duty Drawback Program - Refund of customs duties paid for imported goods that will eventually be exported or used in manufacturing and then exported. This benefits businesses that have already paid duties and wish a refund.

Customs Bonded Warehouses - Companies participating in the Customs Bonded Warehouse Program qualify for complete deferral of duty and taxes. When goods exit the warehouse, taxes are applicable. If goods are re-exported, there are no duties or taxes. The definition of a 'warehouse' is quite broad. It can be part of your office building, a stand-alone facility, or even a hotel conference room, and can be located anywhere within the **m** Point - e.g. anywhere on Vancouver Island!

Export Distribution Centre Program - Provides relief of cash flow cost incurred by export businesses that add limited value when processing or distributing goods such as relabeling, repackaging, assembling or disassembling, inspecting, cleaning, etc. This especially benefits companies, for instance, that are importing goods and/or acquiring goods in Canada without paying GST/HST as long as the goods are later exported.

Exporter of processing Services Program - Qualifies companies to import goods belonging to non-residents without paying GST/HST as long as these goods are imported for processing, distribution or storage and are subsequently exported.

FTZ Point designation is just the beginning of a pivotal time during which Vancouver Island is assuming its role as a prominent component in Canada's Asia Pacific Gateway.

more points...

FTZVI... is unique amongst the thirteen *m* Points across Canada. It is the only broad regional designation and the only designation awarded to a non-government organization. ITT-VI is also the only *m* Point west of Quebec with direct access to ocean transport.

Who... FTZVI will serve import/export interests of Island businesses and transportation providers with all the advantages afforded FTZ Points by the Government of Canada.

What... FTZ Point designation enables aggressive marketing of the Island region to attract international trade activity and expansion of Vancouver Island production of goods for export. FTZVI provides streamlined access to government programs to improve trade.

Where... FTZVI serves all of Vancouver Island wherever opportunity exists to expand international trade and attracting foreign investment. These opportunities are concentrated wherever industrial land and transportation infrastructure is strong. The FTZVI office is centrally located for easy access.

When... FTZVI has been operating since sometime in 2018. VIEA began its efforts to support advanced manufacturing and develop a comprehensive plan for intermodal transportation in 2014. The FTZVI application was submitted in June 2017.

Why... With significant inventory of under-utilized industrial land, transportation infrastructure to handle 10 times the current volume of goods, and a global reputation for our enviable lifestyle, Vancouver Island is poised to play a larger role as part of the Asia-Pacific Gateway. Easy access to tax and duty deferral programs improves the scope of import/export opportunities on the Island and improves cash flow and competitiveness for companies importing and exporting.

How... With substantial stakeholder partnerships in industry and transportation, FTZVI is the 'go to' resource to promote and facilitate international trade and investment on Vancouver Island.

The Vancouver Island Economic Alliance is a non-government, registered non-profit society with a singular mandate to help ensure a vital and sustainable economy for all of Vancouver Island including the Gulf Islands.

FTZVI is the result of several years of work by the Economic Alliance to help raise the profile of Vancouver Island as a preferred location for producing goods for export and as a recognized destination for Foreign Direct Investment.
