### 6 disclaimers

- Contact NAV CANADA immediately if the aircraft is no longer under the pilot's control and inadvertent entry to controlled or Class F Special Use Restricted Airspace (is likely to) occur(s).
- RPAS operators are responsible for ensuring that their operations are compliant with all applicable laws, including the Canadian Aviation Regulations, the Criminal Code, and legislation related to trespass, voyeurism and privacy.
- No flights are allowed when icing conditions are observed or reported to exist or likely to be encountered.
- Pilots must ensure:
  - they review all NOTAMs applicable to their area of operation prior to flight (refer to the NAV CANADA CFPs NOTAM web site: <https://plan.navcanada.ca/wxrecall/>);
  - the safety of their operation at all times, including no likelihood of collision with other aircrafts exists;
  - the site for take-off, launch, landing and recovery is suitable;
  - weather conditions permit an operation within visual line of sight at all times;
  - he or she is familiar with available information relevant to the intended flight before commencing a flight;
  - the RPA has sufficient fuel or energy for the operation; and
  - each crew member has received appropriate instructions.
- Operations in close proximity to buildings may experience RF interference and could result in unexpected equipment behavior.
- RPAS equipped with ELT or with frost, ice or snow adhering to any part are not allowed.

### 3 positives
